Index to Volume 73, 2008

	Issue	Page
A comparison between Gauss-Newton and Markov chain Monte Carlo based methods for inverting spectral induced polarization data for Cole-Cole parameters, Jinsong Chen, Andreas Kemna and Susan S. Hubbard	6	F247
A comparison between the behavior of objective functions for waveform inversion in the frequency and Laplace domains, Changsoo Shin and Wansoo Ha	5	VE119
A comparison of imaging conditions for wave-equation shot-profile migration, Jörg Schleicher, Jessé C. Costa, and Amélia Novais	6	S219
A continuation approach to regularization of ill-posed problems with application to crosswell-traveltime tomography, Kenneth P. Bube and Robert T. Langan	5	VE337
A decade of tomography, Marta Jo Woodward, Dave Nichols, Olga Zdraveva, Phil Whitfield, and Tony Johns	5	VE5
A highly accurate discontinuous Galerkin method for complex interfaces between solids and moving fluids, Martin Käser and Michael Dumbser	3	T23
A modeling study of preprocessing considerations for reverse-time migration, Ian F. Jones	6	T99
A new approach to fitting induced polarization spectra, Sven Nordsiek and Andreas Weller	6	F235
A new sensitivity-controlled focusing regularization scheme for the inversion of induced polarization data based on the minimum gradient support, R. Blaschek, A. Hördt, and A. Kemna	2	F45
A 2.5D finite-element-modeling difference method for marine CSEM modeling in stratified anisotropic media, F. N. Kong, S. E. Johnstad, T. Røsten, and H. Westerdahl	1	F9
Abubakar, A., T. M. Habashy, V. L. Druskin, L. Knizhnerman, and D. Alumbaugh, 2.5D forward and inverse modeling for interpreting low-frequency electromagnetic measurements	4	F165
Acoustic properties of carbonates: Effects of rock texture and implications for fluid substitution, Klaas Verwer, Hendrik Braaksma, and Jeroen A. M. Kenter	2	B51
Acoustic signatures of crossflow behind casing in commingled reservoirs: A case study from Teapot Dome, Andrey Bakulin and Valeri Korneev	4	E145
Acquisition and processing pitfall associated with clipping near-surface seismic reflection traces, Steven D. Sloan, Don W. Steeples, and Peter E. Malin	1	W1
Acquisition geometry analysis in complex 3D media, E. J. van Veldhuizen, G Blacquière, and A. J. Berkhout	5	Q43
Adaptive curvelet-domain primary-multiple separation, Felix J. Herrmann, Deli Wang, and Dirk J. (Eric) Verschuur	3	A17
Adaptive separation of free-surface multiples through independent component analysis, Sam T. Kaplan and Kristopher A. Innanen	3	V29
Addendum	2	Y1
